

HEAT SEEKER

FUN  RUN

What is Heat Seeker?

Heat Seeker is a fun run during the hottest time of the year

Why does Heat Seeker Exist?

Heat Seeker exists to prove that challenging conditions can be embraced as opportunities for growth, rather than obstacles to be avoided.

One More Note.

After years of running in the heat, and the cold, and the humidity, and the rain, and the who knows what else, I've learned there are no bad conditions for a run, besides conditions that make running impossible.

Heat Seeker is a celebration of that philosophy.

Heat Seeker is a choice to decide for yourself what to do when the going gets tough. And the “tough” are complaining about how hot, or how cold, or how rainy, or how dark, or how whatever, it is outside.
